PHILIPS
sense and simplicity

Specifications

Tuner/Reception/Transmission

- **Loop through frequency range:** 47-862MHz

Connectivity

- **Audio output:** Stereo Audio (3.5 mm jack) 1x
- **Plug & Play**
- **TV scart out:** Controlled audio L/R, CVBS, RGB

Convenience

- **Ease of Installation:** Autoinstall
- **Parental control:** Lock with PIN code
- **User Interface:** Now & Next ESG, Software upgrade over the air, TV and Radio mode

Accessories

- **Included Accessories:** High quality SCART cable, Quick install guide, Remote Control, Safety & warranty booklet, User Manual

System Specifications

- **Video decoding:** Video bit rate up to 15 Mbit/s,

Video format 4:3 and 16:9

Audio Decoding

- **Compression format:** MPEG layer I/II

Video Decoding

- **Reception-Demodulation:** COFDM 2K/8K, QPSK, Network: MFN/SFN
- **Frequency range:** VHF III & UHF IV/V

Green Specifications

- Lead-free soldered product
- **Banned Substance Declaration:** Manufacturer, Packaging

Dimensions

- **Product dimensions (W x H x D):** 238 x 42 x 145 mm
- **Weight:** 0.98 kg
- **Weight incl. Packaging:** 1,78 kg

Product highlights

2 SCART connectors

2 SCART sockets allow you to connect to 2 devices at the same time. One for the TV, and the other either to a recording product (e.g. VCR or DVD recorder) for recording of TV programs, or to a video playback device (e.g. DVD player or Blu-ray player). Simply connect the SCART sockets on the product to the SCART socket on the desired devices, by a SCART cable. Video signals would then pass through onto the other device for viewing or recording.

Pulse Killer Chip

Electrical interferences are neutralised by a built in chip called PKC

Parental lock

Channels and installation menu can be locked by PIN code

MHEG iDTV

The MHEG integrated Digital TV allows digital TV subscribers to navigate through a screen of objects, the MHEG, using specialized links. Applications include Internet Digital TV, VOD, Home-shopping, interactive advertising, program retailing and merchandising, electronic newspaper, home banking, E-commerce application, on-line games, and so on.

Freeview access

You want to continue to watch the public broadcasted programs, and also the new programs that were made available during the digital switchover. You can also access MHEG services (games, EPG, videotext). No subscription required to receive the most popular TV channels in the UK brought to you in digital quality.

Automatic installation

New channels are quite often being added to the broadcasting network during the digital switchover. To ensure that you always have the access to all available channels, it is important that the product is able to scan and install new channels automatically. A very sensitive tuner in the product is scanning through the broadcasting network for new channels whenever the product is switched off. Whenever a new service is detected, it will be automatically updated and saved onto the channel list.

Electronic Program Guide 7d

You want to know what are the programs available today and for the next 7 days, so that you can avoid missing your favorite shows by planning your evenings or making pre-scheduled recordings. The data is broadcasted by the program broadcaster, and when this data is available, this product compiles the information and list them in the menu for your easy use reference. Simply enter the menu, or press the EPG button on the remote control to access the program guide. The EPG will provide you with an overview, listing the program information for the upcoming 7 days.
